

LIKITH S

Software Developer | Full Stack Developer

Bangalore, Karnataka | +91-9844844956 | likith.s.9844@gmail.com

GitHub: likith9844 | LinkedIn: likith-s-2004

Summary

Results-driven software developer with hands-on experience in building web and mobile applications, backend systems, and client-facing software solutions. Skilled in Flutter, React, Node.js, PostgreSQL, Firebase, and API-driven application development, with exposure to DevOps workflows and scalable application design.

Education

Alva's Institute of Engineering and Technology, Moodbidri, Karnataka

2023 – 2027

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.9/10

Technical Skills

Programming Languages: HTML, JavaScript, Python, SQL, Dart

Frameworks: React.js, Node.js, Express.js, Tailwind CSS, MERN Stack, Flutter

Web Technologies: HTML5, CSS3, REST APIs

Databases: MongoDB, PostgreSQL

Cloud & DevOps: AWS Cloud Computing, Docker, CI/CD Pipelines

Tools: Git, GitHub, VS Code

Concepts: Data Structures & Algorithms, Responsive Web Design, UI/UX

Experience

Full Stack Developer & App Developer Intern

Dec 2025 – May 2026

Vithsutra Technologies

- Developed client-facing web and mobile applications, contributing to frontend interfaces, backend-connected modules, and application workflows.
- Built software features using JavaScript, React, Flutter, and database-backed workflows to improve functionality and usability.
- Assisted in testing, debugging, and feature implementation for real-world web and app development projects.

Projects

ANI Marketplace App

Flutter, Node.js, PostgreSQL, Razorpay, Stripe

- Built a marketplace mobile application with user authentication, payment integration, and backend-connected product workflows.
- Worked on frontend development, database-backed operations, and secure transaction-oriented platform components.

Telephone Card Recharge Application

Flutter, Firebase

- Developed a recharge application for telephone/RFID card balance management with login, recharge workflow, and transaction handling.
- Implemented frontend screens and Firebase-backed data handling for authentication, balance updates, and recharge operations.

ForenAdb Mobile Forensics

Python, Flask, SQLite, ADB

- Developed a mobile forensics platform for extracting and analyzing Android device data through ADB-based communication.
- Worked on forensic data handling, evidence integrity verification, and dashboard/report generation workflows.

Sign Language Translation System

Python, OpenCV, Machine Learning

- Developed a sign language translation system to recognize gestures and convert them into understandable output for accessibility support.
- Worked on gesture-processing logic and real-time interaction flow for assistive communication use cases.

Certifications

- NPTEL SWAYAM – Introduction to Graphic Design
- NPTEL SWAYAM – Data Structures and Algorithms
- Full Stack Web Development Certification
- Infosys Springboard
